

# Patrick Snowden

Communicative web developer with a passion for creating inclusive websites and environments

## Relevant Experience

Web Developer Intern - **Los Angeles Lakers** Oct 2022 — Present

- Efficiently Manage tasks across multiple projects within tight timelines for the Lakers, South Bay Lakers, and Lakers Gaming
- Migrate code base from Gatsby to Next.js
- Ship production code and carry out quality assurance tests
- Refactor legacy code to enhance end-user experience, ensure compliance with modern standards, and meet NBA requirements

Developer Associate - **Collab Lab** Sept 2022 — Dec 2022

- Contributed to the creation of a responsive smart shopping list web application
- Worked in an Agile team of four, handling project requirements, design, coding, testing, and ongoing improvements
- Utilized pair programming and code review for iterative enhancements
- Collaborated remotely under the guidance of experienced engineers

## Selected Projects

**Lakers Statistics** - Gatsby, Bootstrap, SASS

- Developed a web app showcasing Lakers stats fetched from NBA endpoints, featuring regular season, playoffs, preseason, and summer league data
- Enabled users to switch between game types and view top 3 leaders in major statistical categories
- Collaborated with designer to iterate on designs and implement feedback for continuous improvement

**The Narrative Mind CMS** - Next JS, Next Auth, Tailwind CSS

- Implemented features such as user authentication, content management, and blog post creation/editing
- Designed a user-friendly interface for the frontend, allowing for easy navigation and content management
- Integrated a mongoDB to store blog posts, user information, and other relevant data
- Utilized RESTful APIs for communication between the frontend and backend, ensuring efficient data retrieval and updates

**Money Tracker With AI** - Next JS, TypeScript, Next Auth, Tailwind CSS

- Developed a full-stack money tracking application featuring a responsive frontend and a robust backend
- Integrated AI by allowing the user to ask ChatGPT to provide personalized financial insights and recommendations
- Designed a user-friendly interface that allows users to track expenses and visualize their spending in a fun way
